LIFE BETTER

ALFRED

FOR A FEW PENNIES A DAY, THE VALMETAL HAY BALE DISTRIBUTOR WILL BE AT YOUR SERVICE 24/7

Suspended from an overhead track, the Hay Bale Distributor moves back and forth, slowly and quietly, leaving plenty of time for the cows to help themselves. The big bale plate or small bale basket are insulated against stray voltage.

Versatile, it can handle all sorts of hay bales, round or square, big or small. A whole line of attachments are available to fit your needs.

The Valmetal Hay Bale Distributor can be adapted to almost any barn configuration and run on any type of existing track. Automatic models start, feed and stop at predetermined time without human intervention.

Semi-automatic and automatic models come with an adjustable timer to allow the end of the row cows to be conveniently fed.

Manual models are used mainly as big bale unroller. Only the hoist is motorized and needs to be connected to a 110 VAC outlet when it comes to load the bale. The sturdy trolley is easy to push even with a heavy load. The bale has to be unrolled manually.

Thanks to the powerful hoist aboard the trolley, big bales are easy to load without breaking your back.

SEMI-AUTOMATIC DISTRIBUTOR

ECOLOGICAL AND FRUGAL :

- Noiseless and gaz emanation free.
