

HAMMER MILL

12-1215 Model

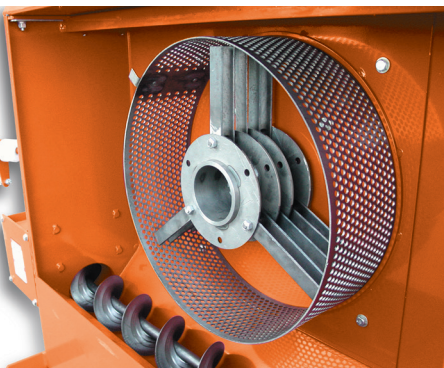

14A75 Model

VALMETAL

HAMMER MILL

SAVE MONEY BY PROCESSING YOUR OWN GRAIN.

The hammers, sharpened on both sides are reversible for longer life and less power requirements.

Made of high carbon steel and heat treated, they offer high resistance to abrasion and shocks.

SCREENS:

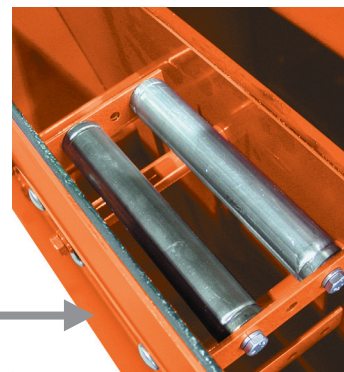

- Available in different sizes to obtain the desired texture (1/16" (2 mm) to 5/8" (16 mm) hole diameter).
- Easy to replace and service, no tools required.

Option: Add control panels to allow autoreverse (at each start, the motor rotation is reversed) for longer longevity of the hammers.

Discharge augers and available accessories:

	12-1215	14A75
Horizontal discharge rigid auger	6" (15 cm) Ø	5" (13 cm) Ø
Vertical discharge rigid auger kit	6" (15 cm) Ø	5" (13 cm) Ø
Flexible discharge auger	3 1/2" & 5" (9 cm & 13 cm) Ø	3 1/2" & 5" (9 cm & 13 cm) Ø
45° auger base	6" (15 cm) Ø	-

Strategically positioned magnets keep metal objects from entering the processing chamber.

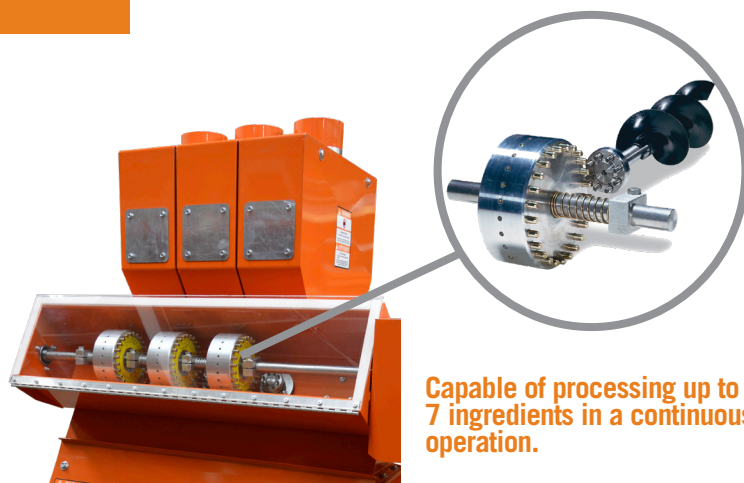

Both models have large hoppers with adjustable slides, allowing excellent flow control of grains entering into the processing chamber.

THE 14A75 HAMMER MILL

This model can be equipped with advanced and reliable proportioners. Our patented positive drive measuring system is easy to set and maintain.

A single 1/4 HP AC motor drives all the proportioners. This is why our system always provides the most precise ration. Each measuring auger is controlled by a roller which features 25 retractable pins to properly measure each ingredient in the ration. To that, add the option of 4 different auger sizes and you have 100 possible adjustments per compartment.

Capable of processing up to 7 ingredients in a continuous operation.

Specifications, descriptions and illustrative material in this literature are as accurate as known at the time of publication, but are subject to change without prior notice. Illustrations may include optional equipment and accessories, and may not include all standard equipment.
